# MERMAID

The «Mermaid» hairbrush is specially designed for gentle cleansing of the scalp while washing hair, massaging the head and easy combing of hair!

Most people are sure that to cleanse your hair it's enough to choose the right shampoo and you don't even realize that the tips of our fingers do the main work when we massage our scalp when washing our hair. For the health of hair and skin, it is very important to remove ke-ratinized scales, excess sebum, residues of cosmetics and other impurities around the hair follicles, as they clog pores, leading to a decrease in oxygen supply, and, as a result, to the formation of dandruff, hair loss, etc. The «Little Mermaid» hairbrush perfectly copes with this task. She has extra-intense bristles: 366 special elastic soft nylon bristles provide maximum effect by cleansing the skin around the hair follicles. The combination of long and short bristles creates different intensities of complementary influences for maximum deep cleansing. The massage effect stimulates the tone of the scalp and improves blood flow to the hair follicles. Also, using the «Little Mermaid» hairbrush, it is easy and convenient to distribute your favorite hair care products along the entire length of the hair. Feel free to use the «Little Mermaid» hairbrush with masks, peeling and scrubs for hair and scalp to enhance the effect!
